Abnormal Clotting														
Obesity														
Bowel Obstruction														

Physical Exam						ASA Status 1 2 3 4 5						
Airway	No	Yes	↓ Jaw ROM	↓ Neck ROM Thyro-mental ≤ 6 cms		Lungs: CTA	Wheezing	Rales	Rhonchi			
Unrestricted Mouth/Jaw ROM						Heart: RR&R	Irregular	Murmur S/D				
History of Difficult intubation						Teeth: Good Repair	Carious/Chipped	Loose	Edentulous	Full/Partial Dentures ↓ ↑		

Special Anesthesia Considerations: NA

Preoperative diagnostic studies and results:

Care Plan for Nurse Anesthesia Trainee

Anesthesia Plan:

- Anesthesia technique:
- Induction medications and dosages:
- Maintenance medications and dosages:
- Emergence medications and dosages:
- Monitoring parameters:

Intraoperative Care:

- Induction process:
- Maintenance of anesthesia:
- Intraoperative monitoring:
- Management of complications:
- Manage cultural consideration:

Postoperative Care:

- Post-anesthesia care plan:
- Pain management strategies:
- Monitoring parameters in the PACU:
- Discharge criteria:

Evaluation and Documentation:

- Documentation of vital signs and events:
- Completion of required forms:

Reflection and improvement opportunities:
